

Arthur KUBIAK

Full Stack Developer – Engineering Graduate

PROFILE

Primarily focused on JavaScript/TypeScript, I enjoy building simple applications that address concrete needs. Curious by nature, I regularly explore new technologies through small projects and value teamwork to turn ideas into solutions.

HARD SKILLS

Frontend: React · Next.js · Vue.js

Backend: Express · NestJS · Laravel

Mobile: React Native · Expo Go

Databases: PostgreSQL · MongoDB · MySQL

Tools & Cloud: Google Cloud Platform · Docker · Firebase · Copilot

Methods: Agile · Git

Other: TypeScript · C# · PHP · Python · Jest

Languages: French (native) · English (professional, TOEIC 840)

PROFESSIONAL EXPERIENCES

Feb–Aug/2025
Cascais, Portugal

b · om Institute,

Tech Lead Developer (Internship)

Led development of an e-learning platform focused on permaculture. Designed the technical architecture, built initial interactive prototypes, implemented management tools, and coordinated the work of three multicultural developers.

React / NestJS / PostgreSQL / Google Cloud Platform / Docker

Jan–Feb/2024
Remote, France

Lacour Law Firm,

Full Stack Web Developer (Internship)

Web platform for mediation appointment booking. Designed and developed a prototype featuring secure authentication, email notifications, Google OAuth integration, and user calendar synchronization.

React / Laravel / PostgreSQL / Google Cloud Platform

Oct–Dec/2023
Hulluch, France

Hulluch Town Hall,

Full Stack Mobile Developer (Internship)

Mobile application for municipal agents to report incidents in real time. Designed and developed the app with interactive mapping, notification system, and external database integration.

React Native / Expo Go / Firebase / Google Cloud Platform

Jan–Apr/2023
Lille, France

DiagRAMS Technologies,

Full Stack Developer (Internship)

Worked on a real-time notification system to improve alert responsiveness for clients. Contributed to enhancing an existing solution that sends automated alerts when infrastructure anomalies are detected.

Next.js / TypeScript / Elasticsearch

RECENT PERSONAL PROJECT

Oct/2025

Musicnn

AI & Audio Processing

Designed and developed a music classification prototype based on audio analysis and pre-trained models to categorize audio tracks.

Python · PyTorch · Ollama
